

15 February 2019

**To Whom It May Concern:**

**With our ever increasing range of products that we offer, we found there being an increase in demand for the supply of quality ladders. We approached Alusmart machinery for their recommendation of what machinery would best suite our specific requirements.**

**Our enquiry was met with purpose and enthusiasm. Samples were sent to the Yilmaz factory in Turkey. Time trials were made available where we subsequently received audio and video feed back of our sections being processed.**

**The conclusion was that of the AIM-7510 (5 axis) machining centre. We have since invested in this model of Yilmaz machine and are impressed in its performance as well as its reputative quality of finish.**

**If we could sum up our experience with Alusmart machinery, it would be sound advice and efficient service. After sales service was imperative in our decision, Alusmart machinery has delivered.**

**Regards**

**David Lyus**
