TO WHOM IT MAY CONCERN

We have dealt with Alusmart machinery for no less than 8 years. The so call smaller range of aluminium fabricating machines that we purchased from Alusmart machinery had proved there with over time.

We have made great strides in our business in the relatively short period of time that we have been operating. Based in Kuruman, we continue to receive excellent service from Alusmart considering the vast distance between us. With much ambition, we have been taking on large and exciting projects where the need for optimization was required. Knowing that we could rely on the guys at Alusmart' s expertise's as well as their reliable after sales service we approached them as being a solutions provider.

Once again Alusmart ticked every box of expectation. Today we are proudly producing a quality product using the AIM-4310 machining centre. Late 2018 we were humbled to find an Alusmart technician as well as a technician from the mother factory in Turkey who took the time to drive 5 1/2 hours from JHB to pay us a curtesy call, Wow.

The AIM-4310 machining centre has proved its worth, I believe it to be a wise investment.

Yours Sincerely,

Greg Majeng
